SmartAxess™ powered by
SECURE ASSET CONTROL

SmartAxess™ Library Locker Systems are the affordable, ADA Compliant solution to giving your patrons secure 24/7 access to their books, video, audio, and other library materials. Patrons can safely and securely have library access when they want and need it most.

Fully integrated 10" touchscreen and barcode scanner give systems the flexibility of secure pin code, barcode, magstripe, or RFID access to lockers through the latest Access.it2 software. Systems allow for restricted authorized self-service pick-up and drop-off of items with electronic chain of custody reporting, controlled 24/7 through remote, web-based management and monitoring software.

Lockers come in a variety of configurations and sizes to ensure there is a perfect solution for your library. They are robust, reliable, and designed with 24" ground clearance. They are engineered to be weather resistant in outdoor situations, and are protected from snow accumulation and rain splash back. Lockers come in pass-thru (built into the library) or non pass-thru (remote) configurations.

APPLICATIONS:

- Libraries, Schools, Universities

BENEFITS:

- Touchless 24/7 secure access for patrons & students
- Full ADA Compliance with 24" ground clearance. Bottom and top locker rows are wheelchair accessible
- Ground clearance protects books and materials from snow accumulation and rain splash back
- Expand distribution without adding "brick and mortar" locations
- Increase patronage without additional staff
- Increase accountability and tracking
- Distribute documents, electronics, or sensitive assets only to authorized users
- Lowest 5-year cost of ownership in the industry
- No annual software fees

Multiple sizes, configurations, and colors are available. Contact LEID Products for details.
